

Northern Clearing offers a complete array of matting services for projects of all sizes. Past projects include thousands of mats, placed in all types of difficult and environmentally sensitive areas. We can also help maximize the use of each mat on your project by offering a forwarding system, which allows us to shuttle mats quickly and efficiently between points of use along the entire project.

OUR SERVICES INCLUDE:

- » Sales and Rentals: Both standard and custom sizes for ultimate flexibility.
- » Logistics: Equipment for both on-road and off-road projects.
- » Placing: Years of experience with every imaginable environmentally sensitive situation, including air bridges, river crossings, underground utilities and more.
- » Removal and Disposal: Comprehensive and efficient cleanup during your project and after your project is complete.
- » Mat Washing: Environmentally sensitive washing that helps prevent cross contamination of weeds and insects, and adheres to strict safety standards.

Timber mats protect sensitive environmental areas by reducing landscape destruction. They can be used almost anywhere equipment is needed to assist in low-impact access to even the most difficult portions of projects.
